ARCTICSTORE™

☎ UK 0208 362 1444

Containers are excellent solution when you need fast, low cost and reliable storage space or
when shipping project and relief cargoes with storage need at destination.

- Starting with 58m² and increasing with 29m² per unit there is almost no limit on the size of the installation. Suitable for use inside, outside or connected to buildings.

Using purpose designed and manufactured 40' container modules ArcticSuperStores combine the many advantages that containers have with the flexibility of wide body storage modules and more. The Super2 model has 42 UK/51 EU pallet capacity.

ArcticSuperStores feature:

20ft ArcticSuperStore modules are available

Hygienic Interiors

- Stainless steel walls and anti-slip flat aluminium floors
- Floors strong enough for use with suitable fork lifts and electric/hydraulic pallet trucks
- 25T capacity per module (evenly distributed)
- 220V lighting
- Easy to operate doors with internal/external operation. Butchers door as option.
- Air curtains on request
- Personnel alarm

Robust exterior:

- MFG stainless steel panels
- Corten steel frame
- Hempels marine paint system
- Self extinguishing
ISO 3582 PU insulation

Reliable Refrigeration Machines

- Marine Refrigeration units with coordinated defrost cycles
- Temperature range -30°C to +30°C
- 380/440V – 3 phase
- Optional economy mode for chill operation
- R134A refrigerant
- In built data logger for technicians use only
- Controlled/modified atmosphere options

Operating Temperatures

Built to maintain accurate temperature control as low as -30°C with external ambient temperatures of up to +50°C and as high +30°C with external ambient temperatures down to -30°C.

Environmental Issues

All container are manufactured in accordance with the latest guidelines and legislation regarding CFC's. Using modern refrigeration machines incorporating the latest technology to give lower power consumption thereby ensuring the lowest possible operating costs.

To the best of our knowledge all the our containers are manufactured using ethical practices and controls.
